

500kW Communication Power Supply Cabinet USA

Overview

How many mw can a DPA 500 Cabinet run?

Cabinets can operate in a parallel configuration to build a system of up to 3 MW (horizontal scalability). The advanced UPS design of DPA 500 provides the highest degree of protection in critical applications where the load must be fed with quality power.

How much power does a DPA 500 provide?

The DPA 500 delivers power protection from 100 to 500 kW (one to five modules) in a single cabinet (vertical scalability). Cabinets can operate in a parallel configuration to build a system of up to 3 MW (horizontal scalability).

How much power does a ML series programmable DC power supply deliver?

The ML Series programmable DC power supplies leverage advanced water-cooled chill plates and internal manifolds to deliver 500 kW and 1,000 kW per cabinet at up to 96% efficiency, achieving nearly fourfold higher power density than comparable air-cooled models while running at full rated power to 50°C ambient.

What is a DPA 500 UPS system?

The advanced UPS design of DPA 500 provides the highest degree of protection in critical applications where the load must be fed with quality power. This UPS system utilizes decentralized parallel architecture and ensures the highest level of reliability and availability with true redundancy across the modules.
