

# 500v solar battery cabinet

## Overview

---

What is a commercial solar battery storage system?

The commercial solar battery storage system is loaded with cell modules, PCS, photovoltaic controller (MPPT) (optional), EMS management system, fire protection system, temperature control system and monitoring system. The system configuration is modular, support multi-machine parallel, plug and play, easy to install and maintenance.

What is a p500e energy storage system?

The P500E has a modular design with a built-in STS and transformer. With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

What is a p500l PV system?

The P500L has a modular design and its main role is to convert the DC power generated by the PV panels into AC power for integration into the grid or for local use. At the same time, the P500L is equipped with features such as Maximum Power Point Tracking (MPPT) to maximise the efficiency of the PV system.
