

# 50kW industrial server racks for airport use in Spain

## Overview

---

What should you know about the rack industry in Spain?

When exploring the rack industry in Spain, several key considerations emerge. First, understanding local regulations is crucial, as compliance with European Union standards and Spanish safety regulations is mandatory for rack manufacturing and installation.

What is a server rack?

Spain - StarTech.com Server Racks offer durable construction that ensures a stable platform for valuable network and server equipment. Our wide range of server racks includes unique wallmount and small form factor options, as well as full-sized heavy duty cabinets, ensuring you find the ideal.

What is a IS-1 server rack?

The IS-1 server rack is specially designed for use in data centres with high heat loads and conditioned air (cooled, no dust in the air). It has perforated doors on both sides for horizontal ventilation. It offers perforated or closed doors depending on the type of cooling architecture selected.

Which server rack should you choose?

From small computer rooms to large data centres, IS-1 server racks are the first choice. Thanks to the flexible expandability – whether in cold or hot aisle containment systems – you can rely on maximum investment security. Regardless of whether it is a small or large data centre, the server hardware must be housed securely.
