

# 8-input 1-output solar combiner box

## Overview

---

What is a solar combiner box?

Solar Combiner Box is the one of the solar component. It used to combine the number of inputs and give single output to the inverter. The combiner box is customized depending upon the Number of Strings. Combiner box is also used to measure the current and voltage produced from the solar PV system with help of string monitoring.

What is shlx-pv8/1 PV combiner box bus?

SHLX-PV8/1 PV combiner box bus synthetic DC input of 8 PV components to 1 output. Each channel is with a fuse. Output side is equipped with lightning protection and circuit breaker. It greatly simplify input wiring of DC power distribution cabinet and inverter. Realize lightning protection, short circuit protection and grounding protection.

What are the different types of PV combiner box?

PV combiner box divided into two types: intelligent box and non-intelligent box. Intelligent PV combiner box is equipped with monitoring unit, then detect input current of each string, detect inside temperature, detect lightning protection status, detect circuit breaker status and summarize output voltage and so on.

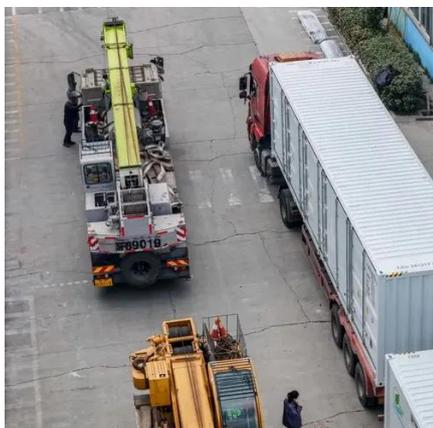

How do I install a solar combiner box?

To install a solar combiner box, first mount the solar charge controller on top of the solar battery bank. Then, connect the solar panel to the combiner box, and the combiner box to the solar charge controller. Finally, connect the solar battery bank to the solar charge controller and a working, direct current (DC) lamp with a switch.
