## Overview

---

Can Albania become a green energy hub in the Balkans?

By developing its renewable energy sector, Albania can do more than meet domestic needs. It can create jobs, reduce reliance on fuel imports, and position itself as a green energy hub in the Balkans. With the right infrastructure and strategic partnerships, the country has the potential to become a net energy exporter in the region.

Who is responsible for implementing energy policies in Albania?

1. Ministry of Infrastructure and Energy (MIE): The Ministry of Infrastructure and Energy is responsible for formulating and implementing energy policies in Albania. It plays a key role in shaping the regulatory framework, energy development plans, and strategies for the sector.

Are energy imports a problem in Albania?

Energy imports do not only have an adverse impact on the country's trade deficit, but they also pose significant risks to the country's energy security. Today, Albania remains a net energy importer as domestic energy production is not able to meet demand.

Does Albania need a diversified energy production mix?

The government of Albania seems to have already acknowledged the need for a diversified energy production mix. The Minister of Energy and Infrastructure, Belinda Balluku, has repeatedly highlighted that one of the key pillars of focus is the national strategy on energy diversification.
