

Austria household energy storage power supply price

Overview

All prices are current open market spot prices in the day-ahead segment without local vat, tax or other additions. Timezone is Central European Time (CET) with Daylight Saving Time (DST). Current time: Sun, 04 Jan 2026 08:55 Data source is Electricity spot prices in Austria .

All prices are current open market spot prices in the day-ahead segment without local vat, tax or other additions. Timezone is Central European Time (CET) with Daylight Saving Time (DST). Current time: Sun, 04 Jan 2026 08:55 Data source is Electricity spot prices in Austria .

Austria's electricity supply in 2025 remains dominated by renewable energy, continuing a long-standing trend. Table 1 summarizes the generation mix based on the latest data (2024), with historical context: Table 1: Austria's Electricity Generation Mix (2024 data with context) Large alpine hydro.

With the electricity price today in Austria you can save 0.27 € for each shower. Heating is one of the things that consumes the most electricity in a typical home. You save about 5% of the costs for heating for every degree you lower the interior temperature. What determines the electricity spot.

Data published comprise average prices and taxes of the most important energy products consumed by the industry as well the private sector. Surveys conducted by Statistics Austria - such as the material input statistics - are an important basis for the published data. Apart from Statistics Austria.

Aus.

The collection of electricity prices depends on whether or not the country has liberalized or regulated power markets. In regulated markets, the government periodically announces new tariff structures. Globalpetrolprices.com uses these documents to distill the information into the numbers that you.

022 compared to the previous year. Statistics Austria detected a 8.5% rise in prices overall, while, in terms of consumer price index, electricity prices increased by 11.1% and in the same direction in 2022. Gas use contracted by 10.2% to 86.4 TWh or 7.6 billion (bn) normal cubic metres (n cu.
