

# Batch Procurement of Chilean Smart Energy Storage Cabinets IP66

## Overview

---

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.

When will large-scale energy storage projects go online in Chile?

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities.

Is Chile ready for a battery storage project?

Battery storage projects cannot come soon enough for Chile. While Chile has been at the forefront of renewable energy generation growth in Latin America for close to a decade, that growth has most recently undergone serious growing pains.

How can technology help develop solar and storage projects in Chile?

Several technological innovation can help develop solar and storage projects in Chile. This includes AI, smart grids, and energy storage innovations. Chile generates over 60% of its electricity from renewable sources, with the Atacama Desert hosting some of the world's most powerful solar farms.
