## Overview

---

Tungsten Carbide is used in film cutting tooling for anodes and cathodes, ensuring clean, precise cuts and long-lasting performance in high-volume production lines. Titanium is applied in casings and structural components for EV batteries.

Oberg Industries drives innovation in battery manufacturing by delivering precision tooling for advanced energy storage solutions. Our expertise in producing film cutting tooling, anode and cathode end cap tooling, and case draw tooling ensures the highest levels of precision and consistency. By.

As a leading manufacturer of polymer, ternary lithium soft-pack batteries, and distributor of LiFePO<sub>4</sub> and lithium titanate batteries, DLCPO Power Technology understands the critical role that electrical control cabinets play in lithium battery production. These unsung heroes of your production line.

Nordson is globally renowned for providing high-quality and innovative battery manufacturing equipment, including 2K dispensing systems, bulk unloaders, slot dies, die lip adjustment systems, x-ray machines, battery pack sealing machines and more. Our precision technology is designed and developed.

Substantial growth in the battery industry. The advanced technology offered by Dürr in partnership with its specialist subsidiary teamtechnik enable you to stay ahead in battery production. As a work and fitting of entire battery factories. Our aim is to offer the manufacturers of lithium-ion.

The formation battery cabinet is the key equipment for battery manufacturing, and the precise control of the battery is realized through the precision manufacturing process. It plays an important role in energy storage system maintenance and

scientific research experiments. In the field of modern.
