Who makes ESS battery cabinets?

ESS manufactures standard and custom battery cabinets, VRLA and VLA racks, Spare on Site Battery Cabinets and battery monitoring solutions for modern Uninterruptible Power Supplies. ESS provides complete design engineering of DC Telecom Systems and manufactures cabinets, racks, bus bars and other innovative products for Wireless and Wire.

What makes ESS Energy base unique?

Each Energy Base project leverages ESS' proven core technologies to deliver the power, energy and layout customers need. Its modular architecture and the inherent safety of ESS iron flow technology enable compliance with safety regulations and community guidelines, providing peace of mind for all stakeholders involved.

Why should you choose ESS for Your Energy BASE project?

ESS has worked closely with leading engineering firms to develop standard, cost-effective design parameters that enable deployment of gigawatt-scale storage. Energy Base projects can be customized to minimize visual impact and deliver up to 300 MWh/acre energy density.

What is an energy base?

The Energy Base allows the power (the rate of electricity flow) to be decoupled from the capacity (the total amount of energy held). This, combined with unlimited cycling and rapid response time, means that the performance of each Energy Base can be tailored to meet individual customer needs.
