

# Belgrade cabinet uninterruptible power supply

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

Why should you choose a DC UPS for control cabinet mounting?

The DC UPS solutions for control cabinet mounting offer reliable protection against power failure, flicker, or DC voltage dips for embedded box PCs, measurement and control technology, control systems/PLCs, sensors, camera and security systems, and more.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.
