Chinese and Brazilian battery energy storage system (BESS) manufacturers and installers are preparing to invest in a promising market beset by rising energy costs and unreliable grid supply just as battery prices have fallen. pv magazine presents a detailed overview of a Brazilian energy storage.

Brazil is taking another decisive step toward integrating large-scale battery energy storage systems (BESS) into its power market. The Ministry of Mines and Energy (MME) has opened a 20-day public consultation on the framework for the country's first major capacity auction dedicated to energy.

The conditions are in place for the country's battery energy storage market to expand at a compound annual growth rate (CAGR) of 20% to 30%, as Holu Solar's Sophia Costa explained. From ESS News Brazilian energy suppliers raised the red flag in September 2024, signaling a rise in electricity costs.

Deployment of behind-the-meter (BTM) energy storage in commercial, industrial, and residential sectors is gaining traction as end-users seek energy cost savings and backup power capabilities. Declining lithium-ion battery costs and advancements in battery chemistry are making large-scale energy.

Brazil's federal government will launch its first major battery energy storage system (BESS) tender in April 2026, targeting 2 GW (~8 GWh) of capacity and mobilizing over USD 2 billion in procurement. The auction presents significant opportunities for U.S. suppliers of batteries, smart-grid.

Brazil's commercial and industrial (C&I) energy storage market is entering a phase of rapid development. Government planning documents—especially the Decennial Energy Expansion Plan (PDE) 2034 —incorporate storage as a strategic component

of Brazil's future energy mix [1] [2]. Regional market.
