

# Buenos aires home solar street lights

## Overview

---

Faced with the threat of rising energy prices and a volatile market, Buenos Aires decided to become a leader in energy efficiency by embarking on this four-year street light retrofit project. The most efficient wa.

Why is Buenos Aires implementing smart LED street lights?

Buenos Aires is retrofitting its street lights with smart LEDs in order to save electricity and better control lighting throughout the city. Faced with the threat of rising energy prices and a volatile market, Buenos Aires decided to become a leader in energy efficiency by embarking on this four-year street light retrofit project.

What are Buenos Aires' new street lights?

Buenos Aires' new street lights include a built-in tele-management system under which every city street light can be controlled remotely from a centralized control panel. This enables the city to turn the lights on incrementally as it gets darker, quickly detect and correct failures, and plan maintenance more efficiently.

Why do Buenos Aires have street lights?

In addition, this energy saving also helped reduce the emission of carbon dioxide (CO<sub>2</sub>) to 44,000 tons per year. In 2013, when the replacement program for old sodium lights began, Buenos Aires had 125,000 street lightings.

How many street lights have been retrofitted in Argentine?

In 2013, the Argentine capital began a public light retrofit project with the goal of replacing 91,000, or 72%, of conventional street lights with energy-efficient LEDs by the end of 2016. The city is well on its way to achieving its goal, as 60,000 street lights have already been retrofitted.
