

Cape town energy storage project

Overview

Will Cape Town own a solar plant?

The city of Cape Town, South Africa, has started building a 7 MW solar plant that it will own and operate. It has also launched a tender for a 5 MW/8 MWh battery energy storage system to be built at the same site. Cape Town is set to become the first city in South Africa to own and operate its own solar plant.

What is the future of energy storage in South Africa?

This is according to a new report by the World Bank which says that over the next five years SA is expected to show rapid growth in energy storage demand. The rise in demand will come from the transformation of the energy system to include more renewables and developing demand in the electric vehicle (EV) sector.

What is the battery energy storage system (BESS) project?

“The battery energy storage system (BESS) project aims to serve as a pilot project to eventually incorporate energy storage within the city’s network,” explains CoCT Energy MMC Xanthea Limberg. “By co-locating the battery system at the Atlantis PV plant, it allows the solar PV and BESS to operate in synergy as a hybrid plant.

When will a battery storage system be built in New York City?

The municipal government has also issued its first battery storage tender, for a 5 MW/8 MWh battery energy storage system to be constructed at the same site. Applications are open until Nov. 20. Both projects form part of the city's 2050 Energy Strategy.
