DC portable charging pile is a product that focuses on safety and practicability, which is suitable for quick DC charging for electric vehicles without fixed charging station. It is mainly composed of human-machine interaction unit, control unit and safety protection unit and is portable and.

EV charging piles, also called Electric Vehicle Supply Equipment (EVSE), draw electricity from the power grid and condition it to match EV battery requirements. They operate much like an electrical version of a fuel pump, providing reliable and convenient access to charging. Whether installed in.

Max Power MC Series are high-performance, portable DC EV chargers designed for flexible and efficient electric vehicle charging. These portable ev charger combine compact design with advanced thermal management, ensuring reliable operation in various environments. With power ratings ranging from.

Home ev charger launched by Sepile, mainly apply to meet the request of Home charging, provide the safe and reliable AC /DC charging service solution. The facility can make AC charge to the EV cars, E-taxis installed with standard charging ports, Communication protocol is compatible with the latest.
