

Clean solar energy for power plants in georgia

Overview

This new, cost-effective clean energy will replace old, expensive, and dirty coal plants, as well as oil and gas plants, while driving more than \$23 billion of new renewable investments to the state over the next 15 years, according to NRDC analysis.² In fact, by 2040, the

This new, cost-effective clean energy will replace old, expensive, and dirty coal plants, as well as oil and gas plants, while driving more than \$23 billion of new renewable investments to the state over the next 15 years, according to NRDC analysis.² In fact, by 2040, the

Passing the clean energy plan has kicked America's clean energy sector into high gear, transforming Georgia into a solar and electric vehicle battery manufacturing powerhouse. Across the state, new clean energy projects have already spurred \$23.12 billion in investment, the second highest in the

Georgia is on the road to a cleaner electricity system, one that will create new economic opportunities, increase in-state generation, and lower power-related carbon dioxide emissions. Strong carbon pollution standards from the Environmental Protection Agency (EPA) are now needed to ensure that.

Authors: Tanya Stasio, PhD, Jordan Burt, PhD, and Elisabeth Seliga May 2025
Senior Researcher Tanya Stasio, PhD, Researcher Jordan Burt, PhD, and Assistant Researcher Elisabeth Seliga prepared a report that reviews the Georgia clean energy policy landscape, assesses Georgia Power's existing fossil.

Clean solar energy for power plants in georgia

[Georgia Power is planning to update the power ...](#)

Unfortunately, and despite the benefits of solar in Georgia's IRP, Telos' analysis also shows that the utility makes incorrect ...
