Our Extra Heavy Duty Galvanite Rust Resistant Storage Cabinet is fabricated from galvanized 14-gauge steel (25% thicker than 16-gauge), which has a zinc-iron alloy coating that is applied at the plant and provides double the protection against corrosion in high-humidity and moist environments.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak shaving, and backup power.

Our Enclosures are designed to protect equipment in a wide range of industrial environments. Built from durable materials such as stainless steel and mild steel, our cabinets provide reliable performance against dust, water, and harsh operating conditions. All enclosures are built with advanced CNC.

AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. The commercial and industrial (C & I) system integrates core parts such as the battery units, PCS, fire extinguishing system.

Power Storage Solutions helps schools reduce energy costs, improve resiliency, and adopt sustainable practices, allowing them to focus on their core mission—education. Power outages in educational institutions can have significant consequences, including: Safety and Security: Campus safety systems.

Machan offers comprehensive solutions for the manufacture of energy storage

enclosures. We have extensive manufacturing experience covering services such as battery enclosures, grid energy storage systems, server cabinets and other sheet metal enclosure OEM services. In addition, Machan emphasises.
