

Cyprus solar drip irrigation system

Overview

Powered by solar energy for hands-free watering, ideal for indoor & outdoor garden use. Ensure proper placement of the solar panel for full sun exposure; protect pump from freezing temperatures. Effortlessly maintain healthy plants with precise drip watering that saves.

Powered by solar energy for hands-free watering, ideal for indoor & outdoor garden use. Ensure proper placement of the solar panel for full sun exposure; protect pump from freezing temperatures. Effortlessly maintain healthy plants with precise drip watering that saves.

Transform your gardening experience with the Solar Drip Irrigation System, the epitome of intelligent plant care. Designed with cutting-edge solar technology, this system is your perfect partner for hassle-free and sustainable gardening. Featuring a powerful 1800mAh battery, it guarantees efficient.

A solar surface water pump is a type of water pump that uses solar energy to move water from surface-level sources like shallow wells, ponds, lakes, rivers, tanks, or reservoirs. Unlike submersible pumps (which are placed deep inside a borehole or well), surface pumps are installed above ground.

Smart watering systems that support beautiful gardens, healthy plants, and landscapes. At Emtech Works, we specialize in automatic irrigation systems that form the foundation of well-maintained landscapes and gardens. Whether it's a small home garden in Nicosia or a large landscaping project.

Taking water directly from containers such as buckets, this Drip Irrigation Kit eliminates the need for a tap, making it easy to water your plants anytime and anywhere. Whether you're a seasoned gardener or just starting out, our Easy DIY Watering System is simple to install with no complicated.
