

# DC power supply for Singapore data center battery cabinets in ports

## Overview

---

What is a data center-optimized DC power protection system?

A data center-optimized, row-based DC power protection system is now available to help data center operators take advantage of that opportunity.

Can a DC UPS be added to a data center?

When additional racks of IT and communications equipment are required for data center growth, new DC UPS units can be added without disruption. The NetSure™ ITM integrates power conversion, battery backup and branch distribution into a compact, highly reliable power protection system.

What is FS data center power solutions?

FS Data Center Power Solutions provide UPS Uninterruptible Power Supply, PDU Power Distribution Unit and Power Cords to deliver reliable battery backup, power management and protection to your power distribution system.

What is row-based DC power?

Data centers are entering a new stage of maturity where the emphasis is on reliably delivering more computing capacity to the organization at lower cost and with reduced power consumption. Row-based DC power represents a practical and affordable solution for reducing data center complexity, increasing efficiency and enabling growth.
