

Discount on 10MWh outdoor cabinet for community microgrids

- ✓ LIQUID/AIR COOLING
- ✓ INTELLIGENT INTEGRATION
- ✓ PROTECTION IP54/IP55
- ✓ BATTERY /6000 CYCLES

Overview

What is Elm microgrid?

MICROGRID SOLUTIONS. ELM MicroGrid delivers scalable Battery Energy Storage Systems (BESS) starting at 100kW and powering projects up to 100MWh and beyond.

What is a community microgrid?

A community microgrid is a group of customers and Distributed Energy Resources (DERs) within clearly defined electrical boundaries with the ability to disconnect from and reconnect to the grid. These microgrids are typically designed to provide energy resilience to important community facilities, such as:

What is a microgrid & how does it work?

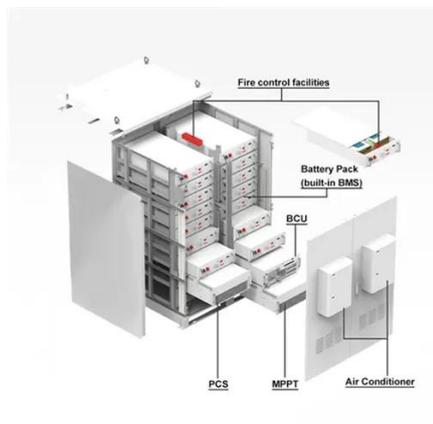

These microgrids are typically designed to provide energy resilience to important community facilities, such as: The microgrid provides a source of localized power for when the larger grid is down. Those sources of localized power, such as a solar photovoltaic (PV) system and battery, can be owned by third parties.

Does PG&E own a microgrid?

Those sources of localized power, such as a solar photovoltaic (PV) system and battery, can be owned by third parties. And, they can participate in wholesale markets for energy and related services. PG&E will continue to own and operate the distribution system on which the microgrid capability is built.
