

# Do solar-powered communication cabinet lithium-ion batteries need to be shipped abroad

## Overview

---

Why do lithium batteries need to be shipped with care?

Lithium batteries need to be shipped with care to avoid issues like delays or rejected cargo. Due to their potential fire risk, they are considered dangerous goods and must follow international rules for packaging, labelling, documentation, and approvals.

Can I ship lithium batteries by Ocean?

If you are shipping lithium batteries by ocean, you will need to make sure that you specify the correct UN numbers and Proper Shipping Names (PSNs), as established in the UN Recommendations on the Transport of Dangerous Goods, commonly known as the Orange Book.

Do lithium batteries need a shipper's Dangerous Goods Declaration?

In addition, a Shipper's Dangerous Goods Declaration (DGD) is generally required when shipping fully regulated lithium batteries, such as those not meeting exemption criteria. However, the need for a DGD depends on factors like battery type, quantity, and mode of transport - with air and ocean regulations differing significantly.

Can a lithium battery be shipped if recalled?

Note: Damaged or recalled lithium batteries are prohibited for air transport. For ocean, acceptance is determined on a case-by-case basis. Shippers should contact their carrier or freight forwarder to confirm if special approvals and packaging can be arranged under IMDG Code provisions. How are lithium batteries classified for shipping?
