A US solar industry group has outlined a nine-point policy agenda calling on New York City's incoming mayor to accelerate rooftop solar and battery deployment to address grid reliability risks, energy costs and climate targets. The New York Solar Energy Industries Association has recommended nine.

US utility Dominion Energy Virginia has outlined options for meeting future power demand, including an additional 12GW of PV and 4.5GW of battery storage. The proposals are contained in Dominion's 2024 Integrated Resource Plan (IRP), which it has now filed with state regulators the Virginia State.
