NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once.

It can help to integrate renewable generation resources, like solar, into our energy system to strengthen it for years to come. As part of our Clean Energy Commitment and in support of New York State's Climate Leadership and Community Protection Act (Climate Act), we're dedicated to helping the.
