

# Estonia smart solar system

## Overview

---

Estonia, a global leader in digital transformation, is now pioneering smart solar system models to optimize renewable energy adoption. With 18% of its electricity already from renewables (Estonia Ministry of Climate, 2023), the country aims to achieve 50% by 2030.

Estonia, a global leader in digital transformation, is now pioneering smart solar system models to optimize renewable energy adoption. With 18% of its electricity already from renewables (Estonia Ministry of Climate, 2023), the country aims to achieve 50% by 2030.

Estonian independent power producer (IPP) Sunly has secured a €62 million (US\$68 million) loan to build and operate a 244MW solar PV plant in Estonia. Construction of the Risti solar park started in November 2024 and the company expects the project to be operational by 2027. It will be located in.

Estonia is taking a significant step toward a sustainable future with the approval of a major solar-plus-storage project at the site of a former oil shale quarry in northwestern Ida-Viru County. This ambitious initiative, a collaboration between Baltic Green Energy and energy company Stora Enso.

Estonia, a global leader in digital transformation, is now pioneering smart solar system models to optimize renewable energy adoption. With 18% of its electricity already from renewables (Estonia Ministry of Climate, 2023), the country aims to achieve 50% by 2030. This article explores how.

Estonia strengthens its energy independence with the largest solar park in the Baltic. Estonia is taking a firm step toward energy independence with the construction of the Risti solar park, the largest in the region. The initiative has secured €62 million in financing, with the European Investment.

Estonia is set to expand its solar-power production with a €62 million loan from the European Investment Bank (EIB) and local banks SEB and Luminor, aimed at financing a new solar park developed by renewable-energy company Sunly. The investment represents a significant step towards the Baltic.
