How much does a data center cost?

Given the near all-time low data center vacancy rates, businesses can expect higher costs as demand outstrips supply. While colocation pricing can start as low as $79 per month for a single server, the actual amount varies widely depending on specific service needs and the provider.

How does colocation affect data center pricing?

High power needs may require renting larger spaces, impacting overall data center pricing. Colocation pricing can be structured based on the amount of space rented (square footage), such as per unit, half rack, or full rack.

How does a data center pricing model work?

The pricing model is based on the amount of colocation space you lease, usually measured in racks or cabinets. Larger organizations may even lease an entire private cage suite to house their data center infrastructure. Data center services are also frequently quantified in terms of "rack units" (RU).
