

# Factory price bess electrical in latvia

## Overview

---

Located in the Ventspils region, right next to the Targale wind park, the BESS project took about two years to be realised and will be connected to the Latvian electricity transmission system this autumn. The project cost EUR 7 million (USD 7.62m) and was financed with a loan from OP.

Located in the Ventspils region, right next to the Targale wind park, the BESS project took about two years to be realised and will be connected to the Latvian electricity transmission system this autumn. The project cost EUR 7 million (USD 7.62m) and was financed with a loan from OP.

Energy company Latvenergo said February 18 it is investing heavily in battery systems with the stated intention of becoming the the Baltic market leader in battery energy storage systems (BESS). "A growing demand in the energy market for battery energy storage system (BESS) technologies is.

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region. This autumn, the Battery Energy Storage System (BESS) will be connected.

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the country's transmission system operator. Meanwhile, Estonia is advancing two major BESS projects, backed with.

A growing demand in the energy market for battery energy storage system (BESS) technologies is developing currently, and the trend is expected to remain stable in the future. Similarly to solar energy and electromobility, this is a strategically new business area for Latvenergo, which is aiming to.

5 standalone BESS projects located across Latvia RTB is either achieved or due 2025 with CODs mostly 2026 Projects range from 10 MWh - 200 MWh, the largest is 100 MWh with an extension available to 200 MWh The selling price is €25k/MWh at RTB or €225-263k/MWh at COD price (incl. RTB) Estimated.

In Latvia, developer Utilitas Wind announced the official opening of a

10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north-eastern Ventspils region. The project is integrated with Targale Wind Park, a 58.8MW wind power plant that went into.
