## Overview

---

Will Hainan become a free trade zone?

In April 2018, China announced plans to transform the island into a pilot free trade zone, with a long-term vision of developing a free trade port with Chinese characteristics. A master plan released in 2020 aimed to make Hainan a globally influential hub for high-level openness by mid-century.

How does Hainan free trade port work?

For transshipment cargos that are shipped from overseas, reloaded, sorted and assembled at the Hainan Free Trade Port and then shipped to other countries or regions, the customs procedures will be simplified. There is no storage period for the cargos in Hainan Free Trade Port, and the storage location can be chosen freely.

Should Hainan have a zero-tariff system?

With a zero-tariff system fundamentally in place after the independent customs operation, high-quality global resources can flow into Hainan with greater freedom and efficiency, Wu said. Trade liberalization and facilitation are defining features of a free trade port.

Does Hainan free trade port require customs formalities?

There is no need to go through customs formalities for goods transshipped to the rest of China at the Hainan Free Trade Port. They shall be loaded and unloaded at the workplaces (sites) under customs supervision in the free trade port, stored separately from other goods under customs supervision, and identified with obvious marks.
