GSL ENERGY provides hotels and inns with efficient and safe commercial and industrial energy storage systems (BESS) that combine lithium iron phosphate batteries and solar power to achieve 24-hour stable power supply, peak shaving, energy conservation and cost reduction, and help meet carbon.

MOBICELL cabinets deliver clean, autonomous power in a compact, stationary footprint — built for sites where reliability matters as much as space efficiency. Designed for telecom, security, industrial, and grid backup, these rugged systems provide continuous, unattended power where trailers or.

The ESS-GRID Cabinet series are outdoor battery cabinets for small-scale commercial and industrial energy storage, with four different capacity options based on different cell compositions, 200kWh, 215kWh, 225kWh, 241kWh, etc. They can be widely used in farms, animal husbandry, hotels, schools.

Off-grid solar storage systems are leading this shift, delivering reliable and clean power to locations worldwide. Among the most scalable and innovative solutions are containerized solar battery storage units, which integrate power generation, storage, and management into a single, ready-to-deploy.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS

technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak shaving, and backup power.
