

How many green solar-powered communication cabinets does ning have

Overview

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a 'critical role' in renewable energy infrastructure, Reuters reports. This has prompted US energy officials to re-assess the risks of emerging technologies produced in China.

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a 'critical role' in renewable energy infrastructure, Reuters reports. This has prompted US energy officials to re-assess the risks of emerging technologies produced in China.

LONDON: US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found inside some of them, two people familiar with the matter said. Power inverters, which are predominantly.

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S. experts who strip down equipment hooked up to grids to check for security issues, the two people said. Over the past nine months, undocumented communication devices.

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found inside some of them, two people familiar with the matter said. Power inverters, which are predominantly.

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found inside some of them, two people familiar with the matter said. Power inverters, which are predominantly.

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented communication devices embedded in power inverters, according to sources familiar with the ongoing investigation. Power inverters-essential.

U.S. energy officials are reassessing the security risks linked to Chinese-

manufactured devices integral to renewable energy infrastructure, following the identification of unexplained communication equipment embedded in certain components, as reported by Reuters. Security experts analyzing.
