

# How to make outdoor energy storage cabinet waterproof

## Overview

---

How do I make a storage box waterproof?

First things first, you'll need a plastic storage box with a secure lid that fits your desired dimensions. You can find these at most hardware or home improvement stores. Make sure to choose a box with a tight-fitting lid to ensure water won't seep in. Next, you'll need some silicone sealant to create a waterproof seal around the edges of the box.

How do you protect a container from water?

Apply waterproof tape to the seams and corners of the container for added protection. This will help ensure that water cannot enter through any gaps in the structure of the box. Consider using a waterproof coating, such as a waterproofing spray or paint, to add an extra layer of protection to the container.

How do I choose the best outdoor storage container?

Lid: Choose a container with a tight-fitting lid that'll keep out rain and other moisture. A lid that can be locked is also a good idea, as it'll add an extra layer of security to your storage box. By taking these factors into consideration, you can select the perfect container for your outdoor storage needs.

How do you keep water from entering a box?

Use silicone sealant to fill any small gaps or holes in the container. This will prevent water from seeping in through any small openings. Apply waterproof tape to the seams and corners of the container for added protection. This will help ensure that water cannot enter through any gaps in the structure of the box.
