Industrial server racks for grid-connected financial leasing in mountainous areas

Overview

What is a server rack?

Server racks are a kind of enclosures that are specifically designed to hold communication, control and measuring devices. They are often seen in data centers, server rooms, factories and offices. Our server racks are designed in accordance with either of IEA or JIS standards.

What is a network rack?

A network rack (also called a server rack) holds networking equipment such as servers, modems, uninterruptible power supply (UPS) units, routers, network switches, and audio and video equipment. Server racks can be a specialized computer case, wall-mount rack, standing frame, or server cabinet designed to enclose networking equipment.

What types of rack enclosures are available?

From IT racks to network racks to data racks and more, we have the solution for your application. Premium rack enclosures for advanced applications, including real device testing racks, RF/EMI shielded racks, smart server racks, pre-customized data center racks, and more.

Which racks are best suited for industrial automation?

Our Steel Racks are best suited to control devices and use for industrial automation. Our Open Racks are suitable for PCs, printers, communication devices and measuring devices. We offer assorted optional accessories for server racks for easier assembly/installation and better customization.
