

# Iran s largest energy storage power station

## Overview

---

Siah Bisheh Pumped Storage Power Plant, also known as Siah Bisheh Power Plant, is a hydroelectric power plant located in the foothills of the Alborz mountain range and adjacent to the Siah Bisheh Trust, located 48 km (30 mi) of Chalus in Mazandaran province, 125 km north of Tehran.

Siah Bisheh Pumped Storage Power Plant, also known as Siah Bisheh Power Plant, is a hydroelectric power plant located in the foothills of the Alborz mountain range and adjacent to the Siah Bisheh Trust, located 48 km (30 mi) of Chalus in Mazandaran province, 125 km north of Tehran.

The power plant uses the pumped-storage hydroelectric method to generate electricity during periods of high energy demand, making it a peaking power plant, intended to fulfill peak electricity demand in Tehran 60 km (37 mi) to the south. When complete it will have an installed generating capacity.

The Iranian Energy Ministry has set a target of adding 10,000 megawatts to the country's renewable power plant capacity by the end of the current government administration . UK investment scheme to boost energy storage infrastructure; . It is located on Chalus river/basin in Mazandaran, Iran.

Iran, with its vast solar potential and pressing energy demands, is poised to transform its energy landscape through renewable energy, particularly solar photovoltaic (PV) and energy storage. Blessed with an average annual solar irradiation of 4.5–5.5 kWh/m<sup>2</sup> and up to 2,200 kilowatt-hours of solar.

MAPNA Group Company as the parent company, along with various specialized subsidiaries and affiliates involved in the engineering, construction and development of thermal power plants, renewable energy plants, power and thermal cogeneration facilities, cogeneration facilities and water.

By 2012, Iran had roughly 400 power plant units. By the end of 2013, it had a total installed electricity generation capacity of 70,000 MW, up from 90 MW in 1948, and 7024 MW in 1978. [1][2][3] There are [as of?

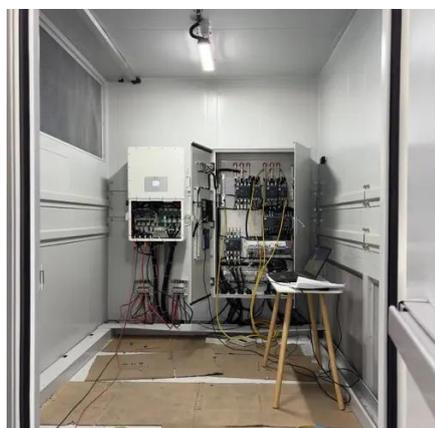

] plans to add more than 5,000 MW of generation capacity annually to the power grid.

The recent opening of Iran's largest solar power plant, Aftab Sharq, in central Isfahan province, marks a significant milestone in the country's pursuit of self-sufficient renewable energy technology. President Masoud Pezeshkian officially inaugurated the 120 MW Aftab Sharq facility in the presence.
