

Large outdoor enclosure for farm use with Porto Novovo IP54 rating

Overview

Can IP54 enclosures be used outdoors?

Yes, IP54 enclosures can be used outdoors, but only in light weather conditions. They protect against dust and splashes, so they're fine under awnings or in sheltered spots. For heavy rain or full exposure, a higher rating like IP65 or IP67 is better.

What are the most common IP ratings for outdoor equipment enclosures?

The following are the most common IP ratings for outdoor equipment enclosures. Equipment that has been designed hardened for outdoor use will perform well in an enclosure rated to IP54. It will give a good level of protection from airborne dust and splashing rain. IP54 allows some ingress of water, subjectively defined as 'limited'.

What is a rated IP54 enclosure?

Enclosures rated with IP54 are protected against limited dust ingress, and from water spray from any direction. Limited dust ingress means that most dust cannot enter the enclosure, but a small quantity of it can. However, the dust that does get through is not nearly enough to disrupt the work of the electrical components of the enclosure.

What is a stainless steel IP54 enclosure?

Stainless Steel IP54 Enclosure KDM manufactured IP54 enclosure to provide top-quality, easily customized cabinets that will perform well in your application. At KDM, our range of IP54 enclosures features a variety of different materials such as aluminum, carbon steel, and stainless steel.
