Telecom cabinets are outdoor or indoor enclosures that house and protect telecommunications equipment. Depending on the specific deployment, these cabinets may hold fiber optic cables, switches, routers, base station components, batteries, AC/DC converters, surge protection devices, and other.

AZE is an OEM NEMA type or IP rated Outdoor Enclosure Manufacturer, our products are designed for Harsh Outdoor Environments, AZE provides a large variety of standard sizes from 16" to 90" high and from 25" to 42" deep with

adjustable and reversible EIA 19" or 23" racking rails, front and rear doors. What are outdoor Telecom cabinets?

Outdoor telecom cabinets are built to withstand harsh environmental conditions. These enclosures protect telecommunication equipment from rain, dust, extreme temperatures, and unauthorized access. They are commonly used in remote locations, such as cell tower sites, roadside installations, and industrial areas.

How much does a small outdoor cabinet cost?

Small outdoor cabinets are often the most affordable option for housing telecommunication equipment. These enclosures are compact and designed to protect essential components in outdoor environments. Prices for small outdoor cabinets typically range from \$500 to \$2,000, depending on the materials and features.

What is an indoor Telecom cabinet?

Indoor telecom cabinets are designed for controlled environments like data centers, server rooms, and office spaces. These enclosures provide a secure and organized space for housing telecommunication equipment. Since they are used indoors, they do not require extensive weatherproofing.

How much does a large telecommunication cabinet cost?

Large indoor cabinets are designed for extensive telecommunication systems in controlled environments like data centers. These telecom racks provide ample space for organizing equipment and often include advanced cable management and cooling systems. Prices for large indoor cabinets range from \$2,000 to \$10,000 or more.
