

Long-term procurement contract for energy storage cabinet

Overview

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase Agreements (PPAs), and term sheets.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase Agreements (PPAs), and term sheets.

Massachusetts has issued a Request for Proposals (RFP) to solicit bids for long-term contracts for up to 1500 MW of energy storage projects. Energy storage is a key tool in reducing our reliance on carbon-emitting generation by storing energy from intermittent renewable generation resources like.

Massachusetts's first " Section 83E " procurement for energy storage is underway, with bids due Wednesday, September 10, 2025, at noon. As we've previously discussed, Governor Maura Healy last year signed into law sweeping clean energy legislation that established a new procurement for energy.

The Commonwealth issued a draft request for proposals of 1.5 GW of batteries with storage durations of 4 to 10 hours, primarily funded through the state's Clean Peak Standard. The procurement is part of a broader effort to procure 5 GW of energy storage by 2030. Lightshift Energy storage system in.

chapter offers procurement information for projects that include an energy storage component. The material provides guidance for different ownership models including lease, Power Purchase Agreement (PPA), or Owner Build and Operated (OBO). It also includes contracting strategies for OBO projects.

Massachusetts is planning to procure 1.5 GW of energy storage resources by 2030, following the state's 2024 legislation mandating the procurement of 5 GW of capacity. The draft request for proposals (RFP) has been released for Long-Term Contracts for Energy Storage Projects, which will include.
