

Moldova energy storage project worth 10 billion

Overview

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW. This will help the country consolidate its energy security.

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW. This will help the country consolidate its energy security.

Preparing for the 2nd annual Moldova Energy Forum, organised by The Voice of Renewables in Chisinau on 10 June 2026, we present a comprehensive summary of the results of the first auction and the outlook for the upcoming round. The inaugural 2025 renewable energy auction attracted significant.

The Republic of Moldova has taken another significant step toward strengthening its energy security by initiating the procurement of a state-of-the-art Battery Energy Storage System (BESS). The tender process, launched by USAID through the Moldova Energy Security Activity (MESA) in partnership with.

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW. This will help the country consolidate its energy security. The process of tendering for the purchasing of the energy.

The government of Moldova has approved an indicative calendar for upcoming auctions aimed at awarding contracts for renewable energy and energy storage projects, with the launch of the next round of tenders scheduled for October 2025. The upcoming auction will offer contracts for the development of.

The Republic of Moldova is entering a new phase in its energy transition, banking on renewables and storage technologies to ensure its independence, stability and competitiveness. The Chisinau authorities are announcing a public tender this autumn for hybrid projects – wind power and photovoltaics.

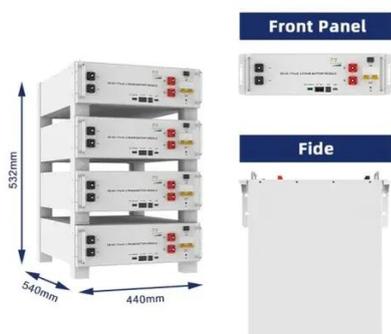

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The Ministry of Energy has announced that a tender

has been launched for this purpose. In the first phase of the tender.
