

Nassau distributed solar energy storage enterprise

Overview

What is community solar & energy storage?

Once completed, the Project will likely be operated as a hybrid community solar plus energy storage project. Community solar is a solar project with access to the local electricity grid. Once the project is connected and generating electricity, energy from the site feeds into the local power grid.

How do I access large-scale solar projects in New York?

In addition, you can access large-scale solar projects that participate in New York's wholesale energy markets (projects larger than 5MW AC) as they are not included in this dataset. To get started, click on the map for county-specific data or hold Ctrl and click multiple counties. To see statewide data, click outside the map.

What incentives will the New York solar project receive?

The Project is expected to be eligible for incentives under the New York State Energy Research and Development Authority (" NYSERDA ") NY-Sun Program and the Retail Storage Incentive Program. The rapid growth of wind and solar power and the rising demand for electricity from data centers are making batteries a necessity.

How do I access statewide solar data?

To get started, click on the map for county-specific data or hold Ctrl and click multiple counties. To see statewide data, click outside the map. Questions or issues accessing this data should be directed to solardata@nyserda.ny.gov. Download a copy of the underlying dataset from Open NY .
