

New battery energy storage company in cebu philippines

Overview

Where is the first battery-based energy storage facility in the Philippines?

The plant, which will be the first battery-based energy storage facility in the Philippines, will be located next to the Masinloc power plant in Zambales. The energy storage array will enhance grid reliability by providing fast response ancillary services like frequency regulation.

Why is MGen launching a second battery energy storage system?

Photo courtesy of MGEN Meralco PowerGen Corp. (MGen), the power generation arm of the Manila Electric Co., is rolling out its second battery energy storage system (BESS) in the country as it accelerates investments to support grid stability and the shift to cleaner energy.

What is MGen's new battery storage project?

The project is MGen's second foray into battery storage, following its planned 4,500 megawatt-hour energy storage facility in Nueva Ecija under MTerra Solar. That project is intended to support a 3,500 megawatt-peak solar pipeline in Luzon.

How many megawatts will Bess deliver in Cebu by 2026?

The Pangilinan-led company said Monday it will deliver the first 25 megawatts (MW) of its planned 49 MW BESS in Toledo, Cebu, by 2026. Full capacity is targeted by 2027, pending regulatory approvals.
