

# Nordic lithium energy storage power supply sales

## Overview

---

Chinese energy storage specialist Hithium has signed a major supply deal with Norway-based EPC contractor Bertel O. Steen Power Solutions (BOS Power) to deliver 3 GWh of battery energy storage systems (BESS) for projects across Denmark, Sweden, Finland, and Norway.

Chinese energy storage specialist Hithium has signed a major supply deal with Norway-based EPC contractor Bertel O. Steen Power Solutions (BOS Power) to deliver 3 GWh of battery energy storage systems (BESS) for projects across Denmark, Sweden, Finland, and Norway.

Madrid, Spain – September 5, 2025 — HiTHIUM, a leading global company in long-duration energy storage technology, today announced it has signed a supply agreement (MSA) with Bertel O. Steen Power Solutions (BOS Power) to deliver 3GWh of battery energy storage systems (BESS) for projects across.

The deal covers a pipeline of utility-scale energy storage projects in Denmark, Sweden, Finland, and Norway, with individual system capacities beginning at 30 MWh. Chinese energy storage specialist Hithium has signed a major supply deal with Norway-based EPC contractor Bertel O. Steen Power.

The report gives a clear look at the fast-growing energy storage market in the Nordic countries, which include Denmark, Sweden, Norway, Finland, and Iceland. It examines how new storage technologies are being used to support renewable energy integration, maintain grid stability, and help the region.

Chinese lithium-ion OEM Hithium and system integrator BOS Power have signed a supply agreement for 3GWh of BESS deployments in the Nordic region. The agreement will see Hithium supply BOS with battery energy storage system (BESS) technology for projects in Denmark, Sweden, Finland and Norway.

On 5 September 2025, BOS Power signed a supply agreement with HiTHIUM, a leading global company in energy storage technology, for the delivery of 3 GWh of battery energy storage systems (BESS) to projects across Denmark, Sweden, Finland, and Norway through 2027. As shown in the photo, CEO Ove Johan.

Global demand for Li-ion batteries is expected to soar over the next decade, with

the number of GWh required increasing from about 700 GWh in 2022 to around 4.7 TWh by 2030 (Exhibit 1). Batteries for mobility applications, such as electric vehicles (EVs), will account for the vast bulk of demand in.
