

Oilfield Communication Power Supply Cabinet 200kW

Overview

What is a 200KW / 800V DC/DC power converter cabinet?

The unit is a non-isolated bidirectional 200kW / 800V DC/DC power converter cabinet solution. Flexible design and application with its 800 Vdc maximum voltage on the high voltage side and up to 400 Adc maximum current. Moreover, several cabinets can be enabled to work in parallel. This functionality is available per client request.

What interfaces are available for magnadc power supplies?

MagnaDC power supplies include RS232 communication interface standard with optional LXI TCP/IP Ethernet (+LXI) and IEEE-488 GPIB (+GPIB) options. SCPI Command Listing Using the rear User 37-pin I/O connector, the MagnaDC power supplies can be completely controlled and monitored using external signals.

Can a power supply exceed a recommended limit?

IEEE has introduced standard, IEEE 519, which defines recommended limits. Implementing this standard requires a knowledge of the power system and other loads producing harmonics. Unfortunately, the standard can allow the same power supply to possibly exceed limits in one application and not in another.
