Battery storage prices have gone down a lot since 2010. In 2025, they are about \$200-\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy.

Let's face it - with electricity bills doing their best rocket launch impression and power outages becoming as common as avocado toast at brunch, home energy storage batteries are no longer just for off-grid hippies. The price of home energy storage battery systems has become dinner table.
