

# Poland centralized project solar energy storage

## Overview

---

Following a public consultation initiated in July 2024, Poland's Ministry of Climate and Environment has officially approved a subsidy program aimed at expanding the country's energy storage capacity by more than 5 GWh.

Following a public consultation initiated in July 2024, Poland's Ministry of Climate and Environment has officially approved a subsidy program aimed at expanding the country's energy storage capacity by more than 5 GWh.

The European Commission (EC) has greenlit Poland's USD 1.2bn scheme for projects to increase electricity storage capabilities to foster the transition to a net-zero economy under the Temporary Crisis and Transition Framework (TCTF). The move, approved on October 3, 2024, will aid Poland's shift.

Power firm PGE has started building a 262MW/981MWh BESS in Poland with LG batteries, coinciding with Solar Media's Energy Storage Summit CEE, which kicked off today (23 September). The state-owned power firm held a groundbreaking ceremony on the 3.7-hour Żarnowiec battery energy storage system.

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage.

The European Commission has approved a EUR1.2 billion aid package to support Poland's rollout of BESS, aiming to establish at least 5.4 GWh of storage capacity. This significant investment is part of a broader strategy to position Poland as an attractive market for energy storage developers.

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion). The program is co-financed by the European Union's Modernization Fund and the Recovery and Resilience.

Poland's state environmental fund says developers sought PLN 28 billion (\$7.7 billion) for 20 GW and 122 GWh of storage projects - nearly seven times the program's budget, with 183 projects eligible for funding. From ESS News Poland's

National Fund for Environmental Protection and Water Management.
