

Price quote for 100kW solar energy storage unit for Australian airports

Overview

How much does a 100kW Solar System cost in Australia?

A high-quality 100kW solar system in Australia typically starts from around A\$39,999, making it a cost-effective choice for medium to large businesses, schools, warehouses, shopping centres, or community facilities. Installation usually costs between A\$1,000 and A\$3,000, depending on your roof type, system complexity, and location.

How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below – from our Commercial Solar PV Price Index – shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

What is a 100kW Solar System?

100kW solar systems are among the most popular commercial solar system sizes in Australia, as this size is the cutoff point for up-front incentives through the federal government. This article provides an overview of most of the key points that businesses need to know if they are considering a 100kW solar system for their commercial premises.

Should you buy a solar inverter for a 100kW Solar System?

It would actually be cheaper to channel the surplus power back to the grid or invest that money in a bigger solar system. With inverters for commercial solar systems, you want to ensure that they are almost the same size (in watts) as your solar system. So, your 100kW solar system should have a 100,000W solar inverter.
