

# Price quote for large-scale pv distributions used in european mines

## Overview

---

The tool displays the capture price received by wind and solar power assets using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom.

The tool displays the capture price received by wind and solar power assets using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable.

Platts has launched an “interactive explorer” tool that shows the capture price received by wind and solar power assets, using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom. Image: Maxim Grama y Andreas Franke, S&P Global Commodity.

The 2025 Europe PV system pricing report covers solar capex for 15 major countries across residential, commercial and utility-scale segments. It includes detailed breakdowns for national average system costs for France, Germany, Italy, Spain and the UK across the three segments. It also provides.

Solar module prices in Europe have risen after months of decline, driven by price increases from Chinese manufacturers and a tight supply of popular modules in the European market. The January edition of the PV.index report from European solar trading platform Sun.store showed that n-type.

In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index published by Germany’s pvXchange Trading, the downward trend persists, driven largely—if not entirely—by.

The EU installed 65.5 GW of new solar PV capacity in 2024, a 4% increase from 2023. What's the cost per MW to deploy solar in 2025?

€450,000 - €650,000. This significant reduction is attributed to overcapacity in module manufacturing and declining supply chain costs. Better energy for better life. What is the 2025 Europe PV system pricing report?

The 2025 Europe PV system pricing report covers solar capex for 15 major countries across residential, commercial and utility-scale segments. It includes detailed breakdowns for national average system costs for France, Germany, Italy, Spain and the UK across the three segments.

How much do solar panels cost in Europe?

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall.

How big is the Europe solar PV market?

The Europe solar PV market size crossed USD 63.1 billion in 2024 and is set to register at a CAGR of 7.1% from 2025 to 2034, due to the growing focus on green energy and net zero initiatives.

Are low-cost photovoltaic modules escaping the price war?

The company recorded price reductions of around 4%, with only low-cost photovoltaic modules escaping the trend. Specifically, in August 2025, the Price Index showed: about €0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. “Manufacturers are moving quickly to end the devastating price war.
