

Quotation for a 5MW Solar Energy Storage Unit Project

Overview

What is a 5 MW solar power plant?

A 5 MW plant is a mid-scale installation, capable of producing enough power to support a large community or small town. Solar energy projects help in reducing dependency on fossil fuels and contribute to sustainable development. 2. Benefits of a Solar Power Plant Environmentally Friendly: Solar energy is clean and produces no greenhouse gases.

Why should you buy a 5MW solar power plant?

As you settle the entire cost of the 5MW solar power plant with your solar energy company, you become the owner of your solar plant and all the energy it generates. As a solar power owner, you benefit from the supply of free-of-cost, clean electricity for the next 25+ years.

How much does a 5 MW solar power plant cost?

For instance, off-grid or hybrid PV setups can be pricier because they need battery backup. But if we consider the average price of a 5 MW solar plant, it would typically fall in the range of ₹36-39/watt. So, the 5 MW solar power plant cost can be anywhere between ₹18-₹19.5 crores.

Can a business use a 5 MW solar power plant?

A business can set up a 5 MW solar power plant to use the power itself and work towards its net-zero goals. Or they can sell the power to other businesses through open access. Several businesses in India are doing both - using a portion of the power for captive use and selling the rest to other corporations.
