

# Single-phase industrial off-grid solar energy storage cabinet grid inverter

## Overview

---

What is an off-grid solar inverter?

An off-grid solar inverter is a solar inverter that works alone and cannot work with the grid. It draws energy from the battery, transforms it from DC to AC, and then outputs it as AC. In a hybrid system, the off-grid inverter can be used to create the grid.

What is a grid-tied solar inverter?

A grid-tied solar inverter is designed specifically for the North American market. The output is fitted with an inbuilt transformer for direct connection to low voltage grids. This model offers a 96.8% efficiency, a range of features and an NEMA 3R enclosure.
