What is solar powered automatic sprinkler irrigation system?

The “Solar Powered Automatic Sprinkler Irrigation System” was implemented and found to be feasible and cost effective. It is advantageous over manual control as it uses time-based control mechanism.

Can a mobile solar-powered irrigation control system be used for real-time scheduling?

This study aimed at developing a mobile solar-powered control system for real-time scheduling using feedback from soil moisture sensors. A smart solar-powered irrigation control system (Smart Irri-Kit) was developed to schedule and automate water delivery to crops based on soil moisture levels.

How a solar powered automatic irrigation system irrigates a farm?

In the field of Agriculture, the importance of automatic irrigation control system cannot be overemphasized. The project presents the design and implementation of "Solar Powered Automatic Sprinkler Irrigation System" that irrigates a farm by switching a DC water pump based on the set-time and the time interval programmed into the microcontroller.

What is a smart irrigation control system?

A smart solar-powered irrigation control system (Smart Irri-Kit) was developed to schedule and automate water delivery to crops based on soil moisture levels. It incorporates an automated tank water level control system that triggers pump activation during irrigation.
