

# Solar components and prices

## Overview

---

To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy and prices from 54 retailers and manufacturers for popular solar panel brands. This chart refers to the average cost range across all common solar system.

To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy and prices from 54 retailers and manufacturers for popular solar panel brands. This chart refers to the average cost range across all common solar system.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy.

Thinking about going solar?

In New York, you'll need a 12.19 kW system to match the average electric bill. It'll cost you around \$23,825 after the federal tax credit. Some states, towns, and utility companies offer incentives that can help lower the cost of solar. Compare multiple offers and save.

The cost of installing solar is far less intimidating when you understand the various components, how savings are generated, and different ways to lower your cash outlay through financing. In this article, we'll explore: Do solar panels really save you money?

As always, our goal is to empower you.

Get solar power system costs based on your location, roof, power usage, and current local offers. Published: January 2026 Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity.

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar

photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs.

**Historic Low Pricing:** Solar costs have reached unprecedented lows in 2025, with systems ranging from \$2.50-\$3.50 per watt installed, making the technology more accessible than ever before. **Federal Tax Credit Urgency:** With Congress proposing to end the 30% federal tax credit after 2025, homeowners.

## Solar components and prices
