

# Solar power satellite factory in sweden

## Overview

---

Will nordcell build the world's greenest solar panel factory?

PVTIME – Nordcell is set to build the world’s greenest solar panel factory, GIGA ONE. The facility will be powered by 100% fossil-free energy and boast a massive annual production capacity of 1.2 gigawatts (GW), translating to 2.5 million solar panels.

Who makes solar modules?

Solar module factory with 120 MW capacity started by REC Solar in 2003. Since September 2016 owned by Renewable Sun Energy Sweden AB. It’s one of the most modern and automated module production facility in Europe Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications.

How much solar power does Sweden have?

Solar capacity factors range from 10% in Norrbotten to 12% in Skåne, with December and January delivering less than 2% of annual output. Swedish demand peaks during winter heating, forcing rooftop owners to export summer surplus at negative prices while buying expensive winter power.

Will a 1.2 GW module factory be built in Sweden?

Sweden-based Nordcell Group announced plans to build a 1.2 GW module factory in its home country. With a site decision coming soon, module production is planned to start in the first half of 2025. Sweden’s Nordcell Group, founded in 2023, has announced plans for 1.2 GW module manufacturing facility to be located in northern Sweden.
