

# Uk advanced energy storage projects

## Overview

---

The scheme is designed to unlock billions of pounds in private investment, with 77 diverse projects → including flow batteries and pumped hydro → now proceeding to secure the future grid.

The scheme is designed to unlock billions of pounds in private investment, with 77 diverse projects → including flow batteries and pumped hydro → now proceeding to secure the future grid.

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in 40 years. Long Duration Electricity Storage.

The UK's battery storage sector is charging ahead at an incredible pace. Since 2020, operational capacity has increased by 509%, climbing from 1,128 MW to 6,872 MW in 2025. So far this year, more than 1,405 MW of new capacity has been commissioned, already beating the total for 2024 and putting the.

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. The UK had 3,096MW of capacity in 2022 and this is expected to rise to 13,000MW by 2030. Listed below are the five largest energy storage projects by capacity in.

Luca works to bring “the outside in”, connecting innovators and academics across sectors and disciplines, to explore the latest technologies that could be adopted to address oil and gas industry challenges. Leading The Net Zero Technology Centre's horizon scanning activity, he identifies emerging.

Fotowatio Renewable Ventures and Conrad Energy are each progressing major solar-plus-battery storage pipelines in the UK. Spain's FRV has, through its majority owned joint venture platform, FRV Powertek, submitted a portfolio of 1.8 GW of fully permitted renewable and battery energy storage.

The UK's new 'cap and floor' revenue scheme de-risks long-duration storage, finally enabling billions in investment for a stable, renewable grid. The UK energy regulator, Ofgem, has advanced 77 Long Duration Energy Storage (LDES) projects

into the next phase of its 'cap and floor' revenue support.

## Uk advanced energy storage projects
