

# Ukrainian energy storage power station energy storage cabinet

## Overview

---

The building of the pumped-storage power plant is connected with the upper basin by 6-pressure reinforced concrete and metal pipelines with a diameter of 3.8 m. The upper basin was created at a height of 70 m above the level of the Kyiv reservoir with a useful volume - 3700000 cubic meters, where during the night decrease in energy consumption in the power system water is pumped. The upper reservoir is discharged in the evening hours at the ti.

## Ukrainian energy storage power station energy storage cabinet
